EDUCATION

Masters of Science in Computer Science, Northeastern University, Boston

Exp. May 2025

Khoury College of Computer Sciences

GPA 3.91/4

Coursework: Programming Design Paradigm, Algorithms, Web Development, Distributed Systems, Human-Computer Interaction

Bachelor of Technology, Vishwakarma Institute of Information Technology

May 2023

Major: Information Technology Relevant courses: DSA, Discrete Structures, DBMS, OS, ML, Web Development

GPA 3.84/4

SKILLS

- **Languages:** Java, C, C++, Python, HTML5, SCSS, JavaScript(ReactJs, NextJs, ExpressJs,AngularJs), Spring Boot, Typescript
- **Databases:** SQL, MySQL, MongoDB, Postgres, DynamoDB, Redis, GraphQL, RabbitMQ
- **Design:** Figma, Canva, Adobe XD, Sketch, UI/UX principles, Wireframing, Prototyping
- **Others:** RESTful APIs, Microservices, Splunk, Grafana, Datadog, Git, Agile methodologies, Test-Driven Development (TDD), User Research, Usability Testing, Responsive Design, Mobile-First Development.

PROFESSIONAL EXPERIENCE

IDEaS Revenue Solutions

Jan 2023- June 2023

Associate Software Developer - Intern

Pune, India

- Developed and executed a comprehensive testing plan for new features and RESTful APIs, resulting in a 15% decrease in post-release bugs reported by the clients.
- Implemented agile development practices using Java & SpringBoot, leading to a 30% decrease in time-to-market for feature releases.
- Conducted thorough code reviews & debugging sessions, reducing the number of bugs in the flagship product by 15%.
- Collaborated with cross-functional teams to prioritize feature backlog based on data-driven insights, resulting in a 10% increase in overall product satisfaction ratings.
- Engaged in usability testing with end-users to identify pain points and iteratively refine designs, contributing to a more intuitive user interface.

PROJECTS

AdultEats - Recipe Finder Web Application

Sep 2024 - Present

- Designed and developed a user-friendly web app to help young adults find recipes based on available ingredients
- Conducted user research and created personas to inform the design process
- Utilized Figma and Canva to create wireframes, prototypes, and high-fidelity mockups
- Implemented responsive design principles to ensure seamless user experience across devices
- Conducted usability testing and iteratively improved the design based on user feedback

Pinpoint - A Geoguesser Social Media ([Project Link](#))

Jan 2024 - May 2024

- Designed an intuitive and engaging user interface using Figma, focusing on user experience and visual appeal
- Conducted user research to inform design decisions and improve overall user satisfaction
- Created responsive layouts to ensure consistent experience across various devices
- Collaborated with development team to implement UI components and ensure design fidelity

Kanbas Learning Management Software ([Github Link](#))([Project Link](#))

Jan 2024 - May 2024

- Designed and implemented a user-friendly interface for a learning management system using React.js
- Created wireframes and prototypes to visualize user flows and gather feedback
- Conducted usability testing to identify and address pain points in the user experience
- Implemented responsive design techniques to ensure optimal viewing across devices
