EDUCATION

Northeastern University - Khoury College of Computer Sciences
Master of Science in Computer Science (GPA: 3.83)

Expected May 2025
Boston, MA

Savitribai Phule Pune University
Bachelor of Technology in Information Technology

June 2023
India

TECHNICAL SKILLS

Languages: Java, C, C++, Python, JavaScript, TypeScript, HTML, CSS

Frameworks: React.js, Node.js, Express.js, Spring Boot, JUnit, Selenium

Databases: MySQL, MongoDB, PostgreSQL, MS SQL

Cloud & DevOps: Amazon Web Services (AWS), Docker, Kubernetes

Others: Linux, Microservices, Git, Agile Methodologies, Test-Driven Development, SOAP, REST, XML, JSON, GraphQL

WORK EXPERIENCE

IdeaS Revenue Solutions | India

Jan 2023 – Jun 2023

Associate Software Developer Intern | Java, Spring, MySQL, Datadog, GraphQL

- Engineered features that boosted the flagship product's performance, using **Java & Spring Boot** with robust **RESTful API** design methodologies.
- Implemented **Test Driven Development** with **JUnit** that reduced defects in dynamic pricing calculations by 30%.
- Leveraged **Java** to craft dynamic pricing algorithms that improved forecast accuracy by 5% and pricing strategies through in-house revenue optimization models.
- Leveraged **Datadog** to diagnose issues in new feature deployments, resulting in a reduction of 100+ developer hours.
- Optimized sluggish **MySQL** queries with advanced indexing, refactoring, & caching, cutting response times by 100ms.
- Utilized **Docker & Kubernetes** to streamline containerized deployments, cutting release times & boosting reliability.

PowerMech Engineering Systems | India

Aug 2022 - Dec 2022

Software Developer Intern | JavaScript, TypeScript, React, Node, MongoDB, Selenium WebDriver

- Designed & built an **end-to-end rental platform** from prototypes to production, using **Figma, React & Node**.
- Applied **UI/UX** best practices to enhance user experience and accessibility, reducing user drop-off rates by 75%.
- Leveraged **jQuery** to simplify DOM manipulation and improve UI/UX responsiveness.
- Revamped **CI/CD** pipelines with parallel builds using Jenkins, Dockerized deploys, cutting deployment time by 60%
- Formulated 50+ End2End tests in **Cypress & Selenium**, achieving 90% code coverage & improving overall reliability.

PROJECTS

Distributed Key-Value Store with PAXOS Consensus - Java, Distributed Systems, Docker

- Architected a distributed key-value store with **Java RMI, PAXOS** consensus, & **multithreading**, ensuring high data consistency across 5+ replicated nodes with low-latency fault tolerance.
- Containerized the app using **Docker** and automated deployment through **Bash** scripting, streamlining the workflow.
- Implemented multithreading in **Java** to manage 1000+ concurrent requests & ensure availability with <3 sec recovery.

Pinpoint - A Geoguesser Social Media - React, Node, Express, JavaScript, TypeScript, MongoDB

- Deployed & maintained scalable infra using **GitHub & AWS**, ensuring high availability, reliability & smooth scaling.
- Leveraged **OAuth, JWT, & role-based access control** to secure user access to 100+ users, using **Node, Express**.
- Optimized performance with server-side caching, pagination, and efficient **MongoDB** data management techniques

Kanbas - Learning Management Software - React, Node, Next, Material UI, JavaScript/TypeScript

- Led UI development of Product Dashboard from prototyping in **Figma** to developing in **JavaScript** with **Material UI**
- Wrote comprehensive testing coverage using **Jest, Cypress** and also optimizing with caching and server-side rendering.
- Engineered advanced authentication mechanisms using **JWT** and implemented automated security testing, enhancing data protection & ensuring secure user sessions, focusing on security best practices.

Image Processing Application - Java, MVC, JUnit, SQL

- Developed a robust **Image Processing App** using **Java & Java Swing** in MVC architecture, incorporating image filters & compression algorithms, enhancing productivity & optimizing resource usage.
- Implemented **custom image compression** algorithm to reduce file sizes by 40% , improving storage efficiency .
- Conducted rigorous **unit testing** with **JUnit**, ensuring 99% code coverage for ease of future maintenance.
